Experience

Jukto Digital — *Bangladesh*

Senior Software Engineer — *October 2021 - October 2026*

- Owned system architecture and led full-stack development of an end-to-end EdTech LMS, covering the complete student lifecycle from admission and course distribution to exams, attendance, and certification.
- Designed and implemented core modules, including automated admission forms, offer letter generation, a flexible payment system with installment scheduling, study plans and timelines, and resource activity management, reducing manual effort and improving operational efficiency.
- Led frontend architecture and managed AWS cloud infrastructure, adding soft delete and update logs for data recovery and ensuring high availability, optimized performance, and robust deployments across production systems.

Technology: Next.js, Django Rest Framework, Django, Typescript, Tailwind, TanStack Query, AWS.

Softspace AB — *Malmø, Sweden*

Junior Software Engineer — *June 2020 - September 2021*

- Developed full-stack web applications across multiple projects, including a social networking platform; analyzed requirements and contributed to solution design in an Agile team.
- Built the query-on-read feed, WebSocket real-time notifications, and Elasticsearch search with pagination and caching, cutting response time by 15%; troubleshot production escalations by deep diving into source code, analyzing network traces, and reviewing product configurations, boosting performance by 10%.

Technology: React, Express.js, Material-UI, Styled components, HTML, CSS, Javascript.

Projects

Sarothi: Exam & Coaching Management — *Web*

Next.js,Typescript, Go, PostgreSQL, Redis, Shardcn, Docker — *Online*

Delivered a BCS exam coaching platform covering admissions, payments, live classes, a question bank and timed mock exams with rankings. Designed a Redis-backed exam engine with batched Postgres sync and group-committed grading for 1 lakh students at once, load-tested at 10k answer saves with p95 110 ms.

Salify: ERP & POS — *Web*

React, Typescript, DRF, PostgreSQL, Redis, Shardcn, Docker — *Online*

Developed a multi-branch sales ERP covering POS billing, inventory, inter-branch transfers, purchasing and customer credit, with role- and branch-scoped access. Fixed a stock overstatement of up to 36% with weighted-average costing, cut N+1 queries (22 → 2) and cut the frontend bundle by 70%.

RichKit: Rich Text Editor — *Package*

React, Typescript, Prosemirror, Turborepo — *Online*

Architected a headless rich text editor framework published as 57 npm packages, with track changes, comments, DOCX/Markdown import and export, and AI writing that streams in as tracked suggestions. The full editor ships at 184 KB gzipped, smaller than Tiptap and CKEditor 5, and is backed by 600+ tests.

Skills

Framework: DRF, Nextjs, Koa.js, Express.js, Tauri
Language: Python, Typescript, Javascript, Rust, Go
Database: MySQL, PostgreSQL, MonoDB.
Tools: Git, Docker, Claude.

Education

Khulna University — *Khulna, Bangladesh*

MSc and BSc in computer science and engineering — *Jan. 2016 - jan. 2024*

At KU, I built a strong foundation in algorithms, data structures, operating systems, databases, and AI/ML, with advanced coursework in distributed databases and ubiquitous computing. I placed in the top 10 nationally in the Code-Samurai contest, won 3rd place at KU CSE Fest 2017, competed in ACM-ICPC and NCPC, and solved 400+ online judge problems. As President of Cluster and Convenor of KU CSE Fest 2019, I led teams organizing inter-university contests, hackathons, and workshops, and I also played for the department volleyball and football teams.
